Mass Fatality Operational Response Plan Template

Customizable Operational Plan

Family Assistance Center Body Recovery Morgue and Identification

SNA INTERNATIONAL

4707B Eisenhower Avenue | Alexandria | VA 22304 | +1-703-370-1930 | www.sna-intl.com

SNA International's template is a fast, easy, and low cost way to gain and implement a customized mass fatality response plan at the operational level.

- Easy and inexpensive tool for communities to begin the important process of planning for an effective mass fatality response operation.
- Customizable template outlines the needed aspects of an operational response.
- Competitively priced at less than 1/10 of what many spend on customized plans.
- Includes five hours of SNA International subject matter expert consulting (an \$875 value) to assist communities as they plan for emergency responses.
- Designed to go from the shelf to the operation — providing guidance, job actions, and forms.
- Content is organized into sections that can be individually distributed to the many different mass fatality responders and put into immediate action.
- 300-plus pages.

Retail Price: \$4,900

- ◆ Each template will be customized.
- ◆ Price includes five hours of SNA International mass fatality subject-matter expert consulting assistance.
 - ◇ Additional hours may be purchased at \$175 per hour.
- ◆ Priced per designated office location specified at time of sale.
- ◆ Reduced pricing available for multiple purchases.

Strengthen Your Current Plan

Ideal for communities that already have a plan or a partial plan in place. At the operational level the customized template will strengthen and complete existing plans. It is designed to go from the shelf to the response and provides guidance, job actions, and forms. This template can be a next step in expanding current plans. Depending on the structure of your community, you may be able to share the cost of the plan with other departments and organizations, such as emergency managers and fire fighters.

Each Section Includes Operational Forms and Three Hours of Consulting

Mass Fatality Family Assistance Center

Section Price: \$2,800

Mass Fatality Family Assistance Center (MF FAC) operations are often the most misunderstood aspect of a mass fatality response. Since this is the portion of the response that interfaces with the public (i.e., families), it is most critical that all participants of the MF FAC understand the operations and their roles and responsibilities. The template details logistics and staffing, security, reception of families, support services, call center, intake, record management, information technology, collection of ante-mortem information, family notification, and body release.

Body Recovery

Section Price: \$1,400

The first stage in the identification process is the recovery of the deceased. There will be tremendous pressure from surviving family members, public officials, the media, and others to rapidly recover and identify the deceased following a mass fatality event. The template outlines the operations required for the efficient and effective recovery of remains, including scene evaluation and the tasks associated with forensic body recovery.

Morgue and Identification Operations

Section Price: \$1,900

The ultimate goal of any mass fatality response is the identification and reunification of the deceased with their surviving family members. The template outlines which forensic specialties will be needed, the size and infrastructure requirements of the morgue itself, ancillary support needed, and other specifics needed to establish a morgue operation that meets the unique requirements of the mass fatality response. Victim Identification Operations will coordinate the identification of human remains. The template outlines the generally accepted guidelines for human identification. Additionally the template outlines the collection and comparison of ante-mortem and post-mortem information for making identifications.

Hospital/Healthcare

Section Price: \$980

This section provides guidance to hospitals, clinics, and healthcare facilities following a mass fatality. Roles and responsibilities are described for the swift implementation, efficient activation and necessary response needed to preserve health and dignity while providing support to citizens.
